ORNAMENTAL NURSERY

11th Annual Catalog

LOCATION-

On Church Road, North of Lake Street. Take Lake Street (Route 5) from Chicago, just 17 miles from State Street to Church Road. Near WMAQ Broadcasting Station.

Phone Elmhurst 3113-M-1

TO OUR CUSTOMERS

TERMS AND GUARANTEE

STOCK—

Our stock is selected for the finest trade, and all plants or roots are well grown and we use every precaution to have goods true to name and well packed so as to arrive in first class condition. Unpack at once upon arrival and report any errors immedaitely, for we cannot allow complaints after 10 days from receipt of goods.

SHIPPING—

Please state how goods are to be shipped, and if no shipping instructions are received, we will send what we think is the cheapest way, all goods are shipped Express Collect (at buyer's expense). Goods damaged in transit, you should enter complaint with Express Co. immediately.

GUARANTEE...

Our seeds are the finest products of American and European Hybridizers and Seedsmen, and we raise many of our finest seeds on our grounds, and as we cannot be responsible for poor weather conditions, poor soil or for any cause that is beyond our control, we cannot guarantee the crop.

TERMS—

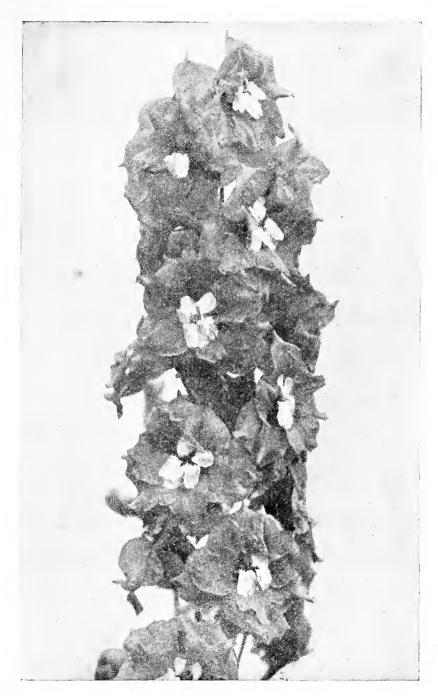

We are a cash house and cannot quote lower prices than listed. We carry no accounts so our prices are not loaded with accounts of long standing. All purchasers must accept these terms and conditions.

Address all communications, orders and remittances to

H. R. LAWRENCE

ELMHURST, ILLINOIS

Telephone Elmhurst 3113-M-1

Delphinium—Mrs. James Kelway.

Seeds are quite hard to obtain and therefore still costly, and seeds will germinate a per centage of darker shades. 50 seeds....\$2.00

VISITORS

Come out any time and inspect our nursery. There is nothing so satisfactory as to see plants in bloom that you wish to purchase. You know just what you are buying. We sell as many plants in blooms as we do dormant roots or young plants.

SOIL

Our soil is ideal for growing Perennials. It is black loam, the kind that is found in the famed corn belt, and Peonies, perennials and general Nursery stock is adaptable to this soil.

We have 10 acres, and have lived here 17 years, and our references are: First National Bank, Elmhurst, Ill.

First State Bank, Bensenville, Ill.

ELEVENTH ANNUAL CATALOG

This catalog cancels all prices quoted in previous catalogs. Add 15c per dozen on plants for Parcel Post.

HARDY GARDEN LILIES

No garden should be without hardy lilies, of easy culture and very striking in appearance. Planted among Delphiniums they are at their best.

	Each	12
Auratum—Gold banded lily of Japan. Large white lily with red spots and gold band through center of each		
petal bulbs	\$.50	\$5.00
5 inch pots, green plants	.75	8.00
Rubrum—Speciosum Magnificum. White ground, heav-		
ily pink spottedbulbs	.50	5.00
5 inch pots, green plants	.75	8.00
Regal—White with yellow throat. Very hardy and fragrant,, Regal bulbs are smaller than other bulbs, 2 inch		
bulb is very largebulbs	.50	5.00
4 inch pots, green plants	.75	8.00
Tiger—Old fashioned yellow with black spotsbulbs 4 inch pots, green plants	.35 .50	3.50 5.00
Thunbergii-Elegans—Very attractive red lilies, 4 in pots, green plants	.50	5.00
Madonna-Candidum—Large white, carry up to 26 lillies on a stem. 5 inch pots, green plants	.50	5.00
Dormant Madonna bulbs are ready in fall.		

All lily bulbs should be planted at least 6 inches or more deep, except the Madonna which should be planted about 3 inches below the crown, and should be planted as early as possible in fall so as to form a green rosette or leaves before winter.

PERENNIAL PLANTS

Perennials are those plants which come up year after year, and as the plants thrive and grow into large clumps their profusion of bloom for nearly eight months of the year soon repays one for the care lavished upon them. Well kept grounds promote real estate values.

All plants are lifted from soil while you wait, or day shipped, and

are cold frame grown or from field, strong one and 2 year stock.

Aconitum-Monkshood—Tall blue spikes of hood like	each	12
nowers, very attractive in July-Aug.	\$.35	\$3.50

PERENNIAL SEEDS

Many gardeners prefer to grow their plants and it is a very good way if a number of plants are wanted, but if the number of plants is limited it is cheaper to select the plants. There is a vast amount of satisfaction in germinating one's own seeds.

Prepare the ground, and sow seeds shallow or scatter on top of soil. Then put fine soil, sand, or peat moss or the three combined over the seeds (one-eighth inch thick). Place burlap over seeds and water.

Seeds, especially hybrid seeds, must never be allowed to dry out. Hybrid seeds will keep germinating for 10 days after the first one germinates. Remove burlap after seeds show green or germinate.

	Each
Aqueligia—Columbine, Mrs. Scott Eliott hybrid. Beautiful and useful, large cups and spurs in many orchid shades. We have measured spurs 5 inches long on older plants	1.00
Carnation—Hardy out door type. New and must not be confused with greenhouse or perishable carnations. We have wintered them at 10 degrees below zero. An ordinary frost does not affect the bloom. All summer bloomer, seeds imported from Europe.	1.00
Carnation-Margaret—Mixed doubles, per pkt	.75
Carnation-Margaret—Crimson doublesper pkt.	1.00
Carnation-Margaret—Rose doublesper pkt	1.00
Carnation-Grenadin-Scarlet, compact habitper pkt	1.00
CarnationOne pkt of each 4 varieties (4 pkts) Delphinium—We have imported the famous Wrexham hollyhock flowered and Kelways hybrids, and they are	3.00
the finest in existence today. There is very little dif-	
ference between the two Delphiniums; Wrexham has	
the ear marks of a hollyhock in the way the blooms	
are placed on the spike. They come in all shades of	
blue with mauve pink centers, and pink dots which	
give them a regal appearance. They grow 5 to 8 feet	
in height and have 30 to 36 inch flower heads. Seeds come 80 per cent doubles, but what few singles there	
are are of such loveliness that many prefer them.	
There are many imitations on the market, but Europe	
is cool enough to grow better and finer seeds than	
warm climates.	
The Delphiniums are too new for all seeds to come	
true to type.	
Delphinium—Wrexham or Kelway, mixed colors,	1.00
	1.00
Delphinium —Dark blue doubles, selected seed, 100 seeds	1.50
Delphinium—Light blue doubles, selected seeds,	1.50
100 seeds	1.50
dark or light 500 seeds	5.00
Delphinium—Mrs. James Kelway, light blue outer petals,	3.00
with mauve pink inner petals and light bee flowers 3	
inches across	2.00
Hollyhocks—Chatters double, mixed colors.	
Hollyhocks—The oldfashioned hollyhocks are still dear	
to garden lovers and are excellent for massing,pkt	.35
Hollyhocks—Large and single, salmon or redpkt	.25
Helenium-Riverton Gem—A wonderful fall flower, 3 to	
4 feet, from Aug. to Oct. Orange clusters of daisy	
like flowers with cone shaped centerspkt	.25
Helenium-Bigelow—Yellow, dark centerpkt	.25
Pyrethrum—Helen Lawrence—A new double painted	
daisy, flowers are of the Anemone type, and resemble	
a large out door fall Chrysanthemum. This is a new	

	Each
pyrethrum and like all new species will have some semi-doubles among the plants. Seeds are scarce. 100 seeds	1.00

ROCK PLANTS

A Rockery does not necessarily have to be on a large scale to give satisfaction. It places your garden above the ordinary. It is a pleasure to plan a rockery whether you have a pool or not. The ordinary garden assumes dignity at small expense with a rockery.

How to start a rockery: Pile soil high on the place selected, allow soil to settle, then place rocks (not too close together) on the pile, and press firmly into soil. Place rocks on an angle upward so as to allow water to drain into soil, not away from soil. Plant into the soil and keep watered until plants are well established.

There are many kinds of plants needed for a rockery, and we have

specialized in a few choice plants and good creepers. Your rockery should be a blaze of color all summer, and green most of winter.

open in a cluster, rapid climber		2.00
12 two year roots		7.00
12 two year roots		7.00
TREE ROSES		

TREE ROSES

Tree roses are among our most beautiful shrubs, and like all lovely plants require care, especially winter care. They should be mulched at all times, and given no cultivation whatever. Northern grown stock, they are H. P. grafted on hardy Rugosa, and are in full bloom all summer. Directions for their care sent with roses.

Frau Karl Druschke—Tree rose, white 3 feeteach	5.00
General Jacqueminot—Tree rose, white 3 feeteach	5.00
Gruss an Teplitz—Tree rose, velvety red, 3 feeteach	5.00
Mrs. John Laing—Tree rose, pink 3 feeteach	5.00
Marshall P. Wilder—Tree rose deep red 3 feet each	5.00

These roses are 3 foot specimen plants when you buy them, and are one crown of bloom in summer.

Roses are shipped by express on account of their weight and bulk.

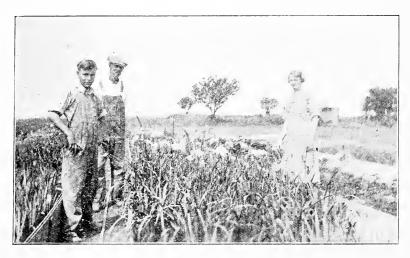

HARDY PHLOX

Select your phlox in bloom. We sell more phlox in bloom than

Select your phlox in bloom. We sell more phlox		
dormant plants, as it does not harm phlox to be moved w	hile in l	bloom.

Iris in bloom

PEONIES

Peonies are one of our most beautiful flowers, and give a garden a regal appearance. Their foliage all summer and late in the fall act as a filler in the border, for it takes a certain amount of foliage or small shrubs to really show flowers to good advantage.

We have tried to select Peonies that are free bloomers, these peonies should give a certain amount of bloom the next spring after planting the roots, and will continue to bloom and grow into large clumps and be satisfactory from the start. All peonies do not bloom freely the first year, but have to get well established before blooming, but one has the satisfaction of knowing that these plants produce immense flowers and it pays one to have a little patience and wait for them to bloom.

Peonies should be planted about 2 or 3 inches below the crown, this depth produces bloom. Do not place manure around peony roots, it may burn the roots, a little bone meal worked into the ground in spring is very beneficial.

The American Peony Society has discarded all peonies that rate below 8.0. Perfection is 10. Their aim is to have peonies that stand up well and retain their bloom, for there is very little satisfaction in wasting years raising peonies that lose their blooms in a day or two, the better varieties bloom long and consistently.

This list is approved by the American Peony Society of which we are members. We are also members of Commercial Peony Growers

Association.

REDS

Standard 3 to 5 eye divisions. 2 eye division at half price (each rate	(ڊ
eac	ch
8.5—Adolph Rosseau (D & M 1890)	
Double dark lustrous red\$ 2.0	0(

TIDNID LILAC.

This collection of Lilacs represents the cream of the Lilac family. Every Lilac listed has exceptional merit, and many of these varieties have flowers an inch or more in diameter and have enormous trusses of bloom. They bloom on young stock 18 to 24 inches high, and come in light blue, pink, red, lavender, rose and white, with variations of lilac shades. Many are early bloomers, bush form.

shades. Wally are early bloomers, bush form.	each	3

FERTILIZER

Clean
Odorless
Sown like
grass seed
Endorsed by
Landscapers and
Nurserymen everywhere.

100	lbs.	\$5.00
50	lbs	3.00
25	lbs.	1.75
5	lbs.	.50

A Swift & Co. product, and used by us in our Nursery.

It pays to buy Fertilizer locally on account of its weight.

PEAT MOSS

Peat Moss and Vigoro are two of the fertilizers we use in our Nursery, and we can highly recommend them to our customers. Peat moss holds moisture and keeps the ground mellow.

Large bales,	enough	for a	large	garden	\$6.00
Small bales,	enough	for a	small	garden	1.50

We do not pay parcel post or freight on Fertilizers .
